

Meeting notes 07-03-2023

Location: DW-HALL-1

Date: 07-03-2023

Time: 14:45 – 15:30

Attendees: Kenzo, Horia, Matei, Karol, Maria, Fleur (online)

Agenda items

Opening by chairperson

No minutes.

Announcements

No announcements.

Approval of the agenda

Nothing to add.

Project structure – to discuss what Karol, Matei and Kenzo already did

- Karol:

backend, created basic entities: board, list, card, tags.
Basic app controller, http requests, posting/getting data
can now use and query the database

- Matei:

frontend, single board, new scene + controller, basic buttons

Issues in GitLab

- we need to add tasks from the backlog into gitlab as actionable items, we will do this directly after the meeting
- we will also give everyone at least one task after adding all of them
- we should add a weight for tasks (which means the difficulty of the tasks)
- we should set targets for subtasks of what should be done

Checkstyles document – we need to decide what to keep from the OOP checkstyles

- keep max function length
 - keep max nr variables
 - keep javadoc
 - keep cyclomatic complexity
- So in the end: keep OOP checkstyles (make changing this a user story)
- Matei adds checkstyles

Additional topics we discussed

- weekly scrums (we can adjust the tasks per person per week if it's not adequate)

Summary of action points

- Add issues from backlog into Gitlab, responsibility: everyone, deadline: 07-03-2023
- Add OOP-checkstyles into Gitlab, responsibility: Matei, deadline: 09-03-2023

(No further minutes)
